

Single Phase Isolation Transformer

PRODUCT DESCRIPTION

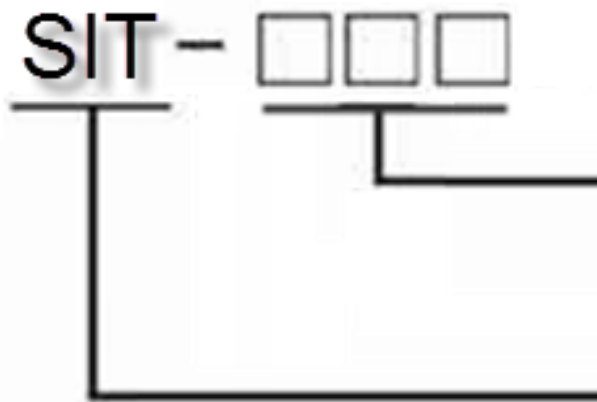

Single phase Isolation Transformer (SIT) from Ilec Electric are well designed and high performance.

They are designed with low impedance, low loss windings. They give good voltage regulation and low voltage drop at rated current. They also can carry high inrush current associated with contactors, solenoids and relays.

Standard size and output voltage to meet popular requirement. Variety design to meet any custom size and voltage.

They can be used for variety control schematic from normal load area to heavy load area.
