SIEMENS

Data sheet

6GK7242-7KX31-0XE0

product type designation

CP 1242-7 V2

Communications processor CP 1242-7 V2 for connection of SIMATIC S7-1200 to GSM/GPRS network; Web server access to CPU, data point configuration, Observe national approvals

transfer rate	
transfer rate	
 for GPRS transmission 	
— with downlink / maximum	86 kbit/s
— with uplink / maximum	43 kbit/s
interfaces	
number of interfaces / acc. to Industrial Ethernet	0
number of electrical connections	
for external antenna(s)	1
for power supply	1
number of slots	
• for SIM cards	1
type of electrical connection	
for external antenna(s)	SMA socket (50 ohms)
for power supply	3-pole terminal block
slot version	
 for SIM card 	Standard
wireless technology	
type of mobile wireless service	
is supported / SMS	Yes
is supported / GPRS	Yes
• note	GPRS (Multislot Class 10)
type of wireless network / is supported	
• GSM	Yes
• UMTS	No
• LTE	No
operating frequency	
• 850 MHz	Yes
• 900 MHz	Yes
• 1800 MHz	Yes
• 1900 MHz	Yes
transmit power	
 at operating frequency 900 MHz 	2 W
 at operating frequency 1800 MHz 	1 W
 at operating frequency 1900 MHz 	1 W
supply voltage, current consumption, power loss	
type of voltage / of the supply voltage	
	DC

	041/
supply voltage / external / at DC / rated value	24 V
relative positive tolerance / at DC / at 24 V	20 %
relative negative tolerance / at DC / at 24 V	20 %
consumed current • from external supply voltage / at DC / at 24 V / typical	0.1 A
from external supply voltage / at DC / at 24 V / maximum	0.22 A
power loss [W]	2.4 W
ambient conditions	
ambient temperature	
for vertical installation / during operation	-20 +60 °C
for horizontally arranged busbars / during operation	-20 +70 °C
during storage	-40 +70 °C
during transport	-40 +70 °C
relative humidity	
at 25 °C / without condensation / during operation / maximum	95 %
protection class IP	IP20
design, dimensions and weights	
module format	Compact module S7-1200 single width
width	30 mm
height	100 mm
depth	75 mm
net weight	0.133 kg
fastening method	
 35 mm top hat DIN rail mounting 	Yes
S7-300 rail mounting	No
wall mounting	Yes
product features, product functions, product components	/ general
number of units	
ODLI /'	
per CPU / maximum	3
per CPU / maximum performance data	3
performance data number of users/telephone numbers / definable / maximum	10
performance data number of users/telephone numbers / definable /	
performance data number of users/telephone numbers / definable / maximum	
performance data number of users/telephone numbers / definable / maximum performance data / open communication number of possible connections / for open communication • by means of T blocks / maximum	
performance data number of users/telephone numbers / definable / maximum performance data / open communication number of possible connections / for open communication	10
performance data number of users/telephone numbers / definable / maximum performance data / open communication number of possible connections / for open communication • by means of T blocks / maximum	10
number of users/telephone numbers / definable / maximum performance data / open communication number of possible connections / for open communication • by means of T blocks / maximum performance data / IT functions number of possible connections • as email client / maximum	10
performance data number of users/telephone numbers / definable / maximum performance data / open communication number of possible connections / for open communication • by means of T blocks / maximum performance data / IT functions number of possible connections	10 like CPU
performance data number of users/telephone numbers / definable / maximum performance data / open communication number of possible connections / for open communication • by means of T blocks / maximum performance data / IT functions number of possible connections • as email client / maximum performance data / telecontrol control center connection	10 like CPU
number of users/telephone numbers / definable / maximum performance data / open communication number of possible connections / for open communication • by means of T blocks / maximum performance data / IT functions number of possible connections • as email client / maximum performance data / telecontrol control center connection • by means of a permanent connection	10 like CPU 1 Telecontrol Server Basic supported
performance data number of users/telephone numbers / definable / maximum performance data / open communication number of possible connections / for open communication • by means of T blocks / maximum performance data / IT functions number of possible connections • as email client / maximum performance data / telecontrol control center connection • by means of a permanent connection • by means of demand-oriented connection	10 like CPU 1 Telecontrol Server Basic supported supported
performance data number of users/telephone numbers / definable / maximum performance data / open communication number of possible connections / for open communication • by means of T blocks / maximum performance data / IT functions number of possible connections • as email client / maximum performance data / telecontrol control center connection • by means of a permanent connection • by means of demand-oriented connection • note	10 like CPU 1 Telecontrol Server Basic supported
performance data number of users/telephone numbers / definable / maximum performance data / open communication number of possible connections / for open communication • by means of T blocks / maximum performance data / IT functions number of possible connections • as email client / maximum performance data / telecontrol control center connection • by means of a permanent connection • by means of demand-oriented connection • note protocol / is supported	10 like CPU 1 Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface
performance data number of users/telephone numbers / definable / maximum performance data / open communication number of possible connections / for open communication • by means of T blocks / maximum performance data / IT functions number of possible connections • as email client / maximum performance data / telecontrol control center connection • by means of a permanent connection • by means of demand-oriented connection • note protocol / is supported • DNP3	10 like CPU 1 Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface No
number of users/telephone numbers / definable / maximum performance data / open communication number of possible connections / for open communication • by means of T blocks / maximum performance data / IT functions number of possible connections • as email client / maximum performance data / telecontrol control center connection • by means of a permanent connection • by means of demand-oriented connection • note protocol / is supported • DNP3 • IEC 60870-5	10 like CPU 1 Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface No No
number of users/telephone numbers / definable / maximum performance data / open communication number of possible connections / for open communication • by means of T blocks / maximum performance data / IT functions number of possible connections • as email client / maximum performance data / telecontrol control center connection • by means of a permanent connection • by means of demand-oriented connection • note protocol / is supported • DNP3 • IEC 60870-5 product function / data buffering if connection is aborted	10 like CPU 1 Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface No
number of users/telephone numbers / definable / maximum performance data / open communication number of possible connections / for open communication • by means of T blocks / maximum performance data / IT functions number of possible connections • as email client / maximum performance data / telecontrol control center connection • by means of a permanent connection • by means of demand-oriented connection • note protocol / is supported • DNP3 • IEC 60870-5 product function / data buffering if connection / with Telecontrol Server Basic	10 Iike CPU 1 Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface No No Yes; 64,000 events
performance data number of users/telephone numbers / definable / maximum performance data / open communication number of possible connections / for open communication • by means of T blocks / maximum performance data / IT functions number of possible connections • as email client / maximum performance data / telecontrol control center connection • by means of a permanent connection • by means of demand-oriented connection • note protocol / is supported • DNP3 • IEC 60870-5 product function / data buffering if connection is aborted number of stations / for direct communication / with Telecontrol Server Basic • in send direction / maximum	10 Iike CPU 1 Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface No No Yes; 64,000 events
performance data number of users/telephone numbers / definable / maximum performance data / open communication number of possible connections / for open communication • by means of T blocks / maximum performance data / IT functions number of possible connections • as email client / maximum performance data / telecontrol control center connection • by means of a permanent connection • by means of demand-oriented connection • note protocol / is supported • DNP3 • IEC 60870-5 product function / data buffering if connection is aborted number of stations / for direct communication / with Telecontrol Server Basic • in send direction / maximum • in receive direction / maximum	10 Iike CPU 1 Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface No No Yes; 64,000 events
number of users/telephone numbers / definable / maximum performance data / open communication number of possible connections / for open communication • by means of T blocks / maximum performance data / IT functions number of possible connections • as email client / maximum performance data / telecontrol control center connection • by means of a permanent connection • by means of demand-oriented connection • note protocol / is supported • DNP3 • IEC 60870-5 product function / data buffering if connection is aborted number of stations / for direct communication / with Telecontrol Server Basic • in send direction / maximum • in receive direction / maximum performance data / teleservice	Iike CPU 1 Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface No No Yes; 64,000 events 3 15
number of users/telephone numbers / definable / maximum performance data / open communication number of possible connections / for open communication • by means of T blocks / maximum performance data / IT functions number of possible connections • as email client / maximum performance data / telecontrol control center connection • by means of a permanent connection • by means of demand-oriented connection • note protocol / is supported • DNP3 • IEC 60870-5 product function / data buffering if connection is aborted number of stations / for direct communication / with Telecontrol Server Basic • in send direction / maximum • in receive direction / maximum performance data / teleservice diagnostics function / online diagnostics with SIMATIC STEP 7	10 Iike CPU 1 Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface No No Yes; 64,000 events
number of users/telephone numbers / definable / maximum performance data / open communication number of possible connections / for open communication • by means of T blocks / maximum performance data / IT functions number of possible connections • as email client / maximum performance data / telecontrol control center connection • by means of a permanent connection • by means of demand-oriented connection • by means of demand-oriented connection • note protocol / is supported • DNP3 • IEC 60870-5 product function / data buffering if connection is aborted number of stations / for direct communication / with Telecontrol Server Basic • in send direction / maximum • in receive direction / maximum performance data / teleservice diagnostics function / online diagnostics with SIMATIC STEP 7 product function	like CPU 1 Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface No No Yes; 64,000 events 3 15
number of users/telephone numbers / definable / maximum performance data / open communication number of possible connections / for open communication • by means of T blocks / maximum performance data / IT functions number of possible connections • as email client / maximum performance data / telecontrol control center connection • by means of a permanent connection • by means of demand-oriented connection • note protocol / is supported • DNP3 • IEC 60870-5 product function / data buffering if connection is aborted number of stations / for direct communication / with Telecontrol Server Basic • in send direction / maximum • in receive direction / maximum performance data / teleservice diagnostics function / online diagnostics with SIMATIC STEP 7	Iike CPU 1 Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface No No Yes; 64,000 events 3 15

product functions / management, configuration, engineeri	ing	
configuration software		
• required	STEP 7 Basic/Professional	
product functions / diagnostics		
product function / web-based diagnostics	Yes	
product functions / security		
product function		
 password protection for teleservice access 	Yes	
 encrypted data transmission 	Yes	
product functions / time		
protocol / is supported		
• NTP	Yes	
time synchronization		
 from control center 	Yes	
standards, specifications, approvals / hazardous environments		
certificate of suitability / CCC / for hazardous zone according to GB standard	Yes

security information		
security information	Siemens provides products and solutions with industrial security functions that support the secure operation of plants, solutions, machines, equipment and/or networks. They are important components in a holistic industrial security concept. With this in mind, Siemens' products and solutions undergo continuous development. Siemens recommends strongly that you regularly check for product updates. For the secure operation of Siemens products and solutions, it is necessary to take suitable preventive action(e.g. cell protection concept) and integrate each component into a holistic, state-of-the-art industrial security concept. Third-party products that may be in use should also be considered. For more information about industrial security, visit http://www.siemens.com/industrialsecurity. To stay informed about product updates as they occur, sign up for a product-specific newsletter. For more information, visit http://support.automation.siemens.com. (V3.4)
